

## [ACCESSING THE JIT](#)

To access the JIT you will require access to either a NIPRNet (Internet) or SIPRNet workstation and a web browser.

## [NIPRNET USERS](#)

Please visit this URL:

<http://jit.fhu.disa.mil>

A Common Access Card (CAC) is required for access to the JIT. Industry partners without a CAC, please visit the External Certification Authority (ECA) PKI Program website at:

<http://iase.disa.mil/pki/eca/>

## [SIPRNET USERS](#)

Please visit this URL:

<http://199.208.204.125>

This is a SIPRNet address and cannot be accessed via the NIPRNet (Internet).

Please note that the SIPRNet JIT does not require a user account (i.e., username and password). Access to the SIPRNet JIT is open to all cleared personnel with access to a SIPRNet workstation.

Please visit the JITC Web Site at the following URL:

# JOINT INTEROPERABILITY TOOL (JIT)

**Experts in Testing and Certification**  
**Accelerating the Nation's IT Dominance**

## [INTRODUCTION](#)

The Joint Interoperability Test Command (JITC) Joint Interoperability Tool (JIT) provides high speed access to key interoperability information. The heart of the system is an extensive data repository featuring the JITC Lessons Learned reports, JITC Test Reports, the NATO Interface Guide, Joint Interoperability Certification letters, and other interoperability documents and references; as well as a high speed search engine to quickly access data. This tool gives a quick and easy on-line capability which identifies system/equipment characteristics, tested configurations and practical “how-to” information to facilitate interoperability.

## [JIT FEATURES](#)

- ◆ **[Quick Search:](#)** The search capability makes it easy for you to find what you need on the JIT. You may search either by keywords or concepts. To begin, enter the keyword(s) or equipment nomenclature inside the query box, then click the [Go] button.

*The Joint Interoperability Tool Main Page.  
Log in and have access to all of the JIT's features.*

- ◆ **[What's New:](#)** Provides a list in tabular format of all the new JIT documents and updates for the last few months.

### Reports

- ◆ **[Test Reports:](#)** Lists numerous test reports organized by type:
  - ◇ Reports on DISA Programs
  - ◇ Interoperability Test Reports
  - ◇ Conformance Test Reports
  - ◇ Operational Test Reports
  - ◇ Assessment Reports

- ◆ **[Certification Letters:](#)** Complete listing of certifications since FY94. The recent certification summaries (FY96 and on) also include the certification letters and testing summaries.

- ◆ **[Lessons Learned Articles:](#)** Provides relevant information regarding tactical and strategic Command, Control, Communications, Computers and Intelligence (C4I) equipment and systems. Reports published over the last six years are available and are organized by date and by equipment type.

- ◆ **[Lessons Learned from the Field:](#)** Lessons Learned from the Field allows an organization with access to the SIPRNet or NIPRNet to submit a lessons learned suggestion. Suggestions are verified by JITC staff and if accurate, incorporated into the JITC Lessons Learned Report. This page also allows you to check the status of Interoperability Lessons Learned Inputs received from the field.

- ◆ **[Bosnia Reports:](#)** Provides a selection of reports on various technical demonstration in the Bosnian region, including, assessments and joint endeavors.

- ◆ **[CWID Reports:](#)** Coalition Warrior Interoperability Demonstration (CWID) Reports.

### Projects

- ◆ **[Department of Defense Interoperability Communications Exercise \(DICE\):](#)** Provides links to the most recent DICE Executive Reports and Detailed Test Reports. The Detailed Test Reports are divided into major sections by equipment type from which users may select specific test.

### References

- ◆ **[References:](#)** Instructions and directives may be viewed on-line in their entirety.
- ◆ **[Policy and Guidance:](#)** Provides the seven Volume Joint Chiefs of Staff Manual for Employing Joint Tactical Communications. Each volume includes a hyper-linked table of contents for that particular volume for easier navigation.
- ◆ **[NATO Interface Guide:](#)** Provides network planners and equipment users guidance, alternative solutions, and additional configurations for interfacing switching equipment of different nations into networks providing those communications capabilities required by the NATO forces.
- ◆ **[And More:](#)** JITC Points of Contact, JITC Annual Report, The JIT Tour, Site Statistics, Feedback, etc.
