

JITCI 380-50-02 Released

Control Number 06-002

The Commander has signed JITC Instruction (JITCI) 380-50-02, "JITC Interoperability and Standards Conformance Test and Evaluation (T&E) and Certification Instruction" (28 September 2004). **This instruction is effective immediately and cancels JITCI 720-15-8 (17 August 2001).** The policy and procedures identified in this instruction apply to all military and civilian personnel assigned to or employed by JITC and contractors engaged in work on behalf of JITC, and to all JITC T&E and certification efforts.

Recent changes in DOD interoperability policy have necessitated significant changes to this instruction and several internal JITC processes. Some areas relating to the Net Ready Key Performance Parameter (NR-KPP) lack complete detail. However, DOD guidance in this area is also incomplete. We will continue to evolve our policy and procedures in concert with DOD.
