Joint Interoperability Test Command (JITE)

31 Aug 12

MEMORANDUM FOR DISTRIBUTION

SUBJECT: Extension of the Joint Interoperability Certification of the Apple, Incorporated (Inc.) iPad2 Version iOS 5.0.1 to include the new iPad Version iOS 5.1

References: (a) Department of Defense Directive 4630.05, "Interoperability and Supportability of Information Technology (IT) and National Security Systems (NSS)," 5 May 2004
(b) Department of Defense Instruction 8100.04, "DoD Unified Capabilities (UC)," 9 December 2010
(c) through (f), see Enclosure

1. Reference (a) establishes the Joint Interoperability Test Command (JITC), as the responsible organization for interoperability test certification. Reference (b) further establishes JITC as the interoperability certification authority (CA) for all Unified Capabilities (UC) products.

2. The Unified Capabilities Requirements (UCR), Reference (c), defines two Use Cases for Multifunction Mobile Devices (MMDs). Use Case 1, which is also referred to within Reference (d) as a Commercial Mobile Device (CMD), has no connectivity to a Department of Defense (DoD) network, while Use Case 2 supports connectivity to DoD networks.

3. The Apple, Inc. iPad2 Version iOS 5.0.1 met the Use Case 1 requirements in the UCR, and is certified for joint use as an MMD (also CMD). This MMD is certified to process only non-sensitive, publically available DoD information and shall be limited in use to those DoD tasks authorized by the Chief Information Officers for Combatant Commands, Services, and Agencies. There are no interoperability (IO) requirements applicable to an MMD for Use Case 1. Therefore, no IO testing was conducted and an IO test summary is not included in this certification. The JITC's GIG (Global Information Grid) Network Test Facility (GNTF) at Fort Huachuca, Arizona, conducted functional testing and Information Assurance (IA) testing using the General Mobile Device (Non-Enterprise Activated), Smartphone Policy, Wireless Management Server, and General Wireless Policy Security Technical Implementation Guides (STIGS). JITC does not certify any other configurations, features, or functions, except those cited in the IA Assessment Report, Reference (e) and approved by the IA CA, Reference (f). This certification expires upon changes that affect the approved IA configuration, but no later than three years from the date of the original UC Approved Products List (APL) memorandum (31 July 2012).

4. The extension of this certification is based upon Desktop Review (DTR) 1. The original certification is based on IA and functional testing conducted on 27 February 2012 by JITC, Fort Huachuca, Arizona, and United States Air Force (USAF) IA CA approval. The USAF IA CA approval was granted on 17 May 2012. This DTR was requested to include the new iPad with

JITC Memo, JTE, Extension of the Joint Interoperability Certification of the Apple, Incorporated (Inc.) iPad2 Version iOS 5.0.1 to include the new iPad Version iOS 5.1

iOS 5.1. JITC reviewed all of the documentation and determined that the new iPad with iOS 5.1 is similar to the iPad 2 for interoperability and IA purposes. The USAF IA CA provided a positive recommendation for this DTR on 9 September 2012. Therefore, JITC approves this DTR without further testing. All associated test data is available on the Defense Information Systems Agency Unified Capabilities Certification Office (UCCO) website located at <http://www.disa.mil/ucco/>. The UCCO tracking number is 1204802.

5. The JITC point of contact is Mr. Cary Hogan, DSN 879-2589, commercial (520) 538-2589; e-mail address is cary.v.hogan.civ@mail.mil. JITC's mailing address is P.O. Box 12798, Fort Huachuca, AZ 85670-2798.
